Symbols

- \$DATA (5.48)
- \$File_Name summary (5.38)
- \$LOG File (5.67)
- \$LOG File Codes (5.75)
- \$USNJRNL (5.69)

A

- Account group Enumeration (event codes) (2.80)
- Account logon (2.70)
- Account management events (Codes) (2.93)
- activity pattern in journal (5.71)
- ADS (5.50)
- amache.hve (2.18)
- Anti-Forensics Counters (5.112)
- Attack life cycle (1.42)
- auto start locations (1.68)

B

- Built in accounts (special accounts) (2.55)

- BYOVD (3.177)

C

- Cobalt strike Sacrificial process (3.75)
- Code Injection (3.111)
- Code Injection Assembly (3.129, 130)
- Code Injection Detection Tools (3.115)
- common anti-forensics tech (5.5)
- CTI platforms (1.49)

D

- DCOM Abuse (2.127)
- Detecting userland and kernel inconsistencies (3.139)
- DLL Hijacking (1.76)
- DLL Injection : Attach and allocate (3.117)

E

- Eprocess Block (3.30)
- Event Codes summary (2.214)
- Event log clearing (Codes) (2.163)
- EventLogs (2.38)
- Evidence of Malware execution (Codes) (2.168, 172)
- Extracting in memprocf (3.191)
- extracting in vola (3.194)

F

- File entropy (4.7)
- File Recovery (5.96)
- File system timeline (MCAB) (4.32)
- File wiping "sdelete" (5.87)

H

- history of file systems (5.18)

I

- IR process (1.23)
- ISTAT (5.32)

K

- Kansa (1.100)
- KAPE (1.109)
- KDBG (how to read memory) (3.17)
- Kerborsting (Codes) (2.144)

L

- Logon Error Codes (2.75, 76)

- Logon Event IDs (2.47)
- Logon type codes (2.51)

M

- Malware Anamoly Detection Tools (4.5)
- Malware common locations (1.59)
- Malware Detection Type (1.53, 56)
- Malware persistence mechanisms (1.67)
- Memory Acquisition (3.11)
- Memory Baeliner (3.58, 60)
- MemProcFS (3.101)
- memprocfs find evil + yara (3.136, 147, 151)
- MemProcFS Usage (3.102)
- MFT (5.23, 24)
- MFT Entry Example (5.30)
- MFT Header entry and bytes (5.34)
- MITRE ATT&CK (1.45)
- Mutants (3.89)

N

- Named Pipes (3.88)
- Network share access (Codes) (2.103)
- NTFS Directory Attribute (\$130) (5.57)
- NTFS Features (5.20)
- NTFS File Deletion (5.83)

O

- Other wipers (5.89)

P

- Pipes (Codes) (2.105)
- Pivot Point (4.26)
- Powershell Logging (Codes) (2.194)
- Powershell transcript Logs locations (2.208)
- Process Memory (3.134)

R

- Rapid Response tooling solutions (1.93)
- RDP (2.62, 67)
- Reflective Code Injection (3.121)
- Registry key recovery (5.94)
- Registry modifications (Codes) (2.123)
- Remediation events (1.32)
- RootKit : API Hooks (3.174)
- RootKit : DKOM (3.168)
- RootKits (3.161)

S

- schedule tasks (1.73)
- Scheduled tasks (Codes) (2.109)
- Services Codes (2.116)

- Shadow copy mounting (5.13)
- Shimcache (2.14)
- SIDs (3.79)
- SuperTimeLine recommended columns (4.85)
- SVCHOST.EXE (3.40)

T

- targeted SuperTimeLine (4.66)
- Task scheduler artifacts (2.113)
- time stamp manipulation (5.44)
- time stomp detection (5.47)

U

- USN "reason" codes (5.74)

V

- Velociraptor (1.111)
- VOLA - CmdLine (3.71)
- VOLA Netstat (VOLA) (3.97)
- VSS (5.8)
